

OASIS Security Report

Executive Summary

Date: 2026-06-12 01:38:34

Model: llama3.2:3b

Overview

Analyzed 24 vulnerability types across the codebase.

How to read this executive summary

The tables below group analyzed files by **embedding similarity** between each vulnerability type and the file (cosine similarity). This ordering reflects **retrieval relevance**, not exploit severity and not the severity labels inside per-vulnerability JSON/HTML reports.

Tiers: strong (similarity ≥ 0.80), moderate ($0.60 \leq \text{similarity} < 0.80$), weak (similarity < 0.60). For authoritative finding counts and severities, open the linked vulnerability-type reports.

Models Used

- Deep model: llama3.2:3b
